

ENERGY AND ENVIRONMENT - Monthly Lecture Series 2004

3rd Thursday - 7 to 9 PM City of Scottsdale, Community Design Studio, 7506 E. Indian School Rd. (NE corner of 75th Street & Indian School Road)

The *Energy and Environment* Lecture Series is sponsored by the Arizona Solar Energy Association and the Arizona Solar Center in cooperation with the City of Scottsdale Green Building Program.

ISSUE: Energy and Environment Overview Introduction to the Series with a history and perspectives re: energy and its role in our lives.
March 18, 2004 RESOURCES: Toward Security, Stability and Sustainability – Renewable Energy Opportunities for Power and Independence Overview of renewable energy power sources including wind, water, geothermal, hydrogen, and solar. April 15, 2004 STRATEGIES: Site and Situation – Planning, Designing and Landscaping for Appropriate Desert Integration Energy and resource efficient site planning and landscaping. May 20, 2004 STRATEGIES: Passive First – Reduction of Power Demands Through Design With Nature Passive solar strategies for an energy efficient building through orientation, spatial arrangement, materials selection, and building element placement.
Renewable Energy Opportunities for Power and Independence Overview of renewable energy power sources including wind, water, geothermal, hydrogen, and solar. April 15, 2004 STRATEGIES: Site and Situation – Planning, Designing and Landscaping for Appropriate Desert Integration Energy and resource efficient site planning and landscaping. STRATEGIES: Passive First – Reduction of Power Demands Through Design With Nature Passive solar strategies for an energy efficient building through orientation, spatial arrangement, materials selection, and building element placement.

hydrogen, and solar. April 15, 2004 STRATEGIES: Site and Situation – Planning, Designing and Landscaping for Appropriate Desert Integration Energy and resource efficient site planning and landscaping. May 20, 2004 STRATEGIES: Passive First – Reduction of Power Demands Through Design With Nature Passive solar strategies for an energy efficient building through orientation, spatial arrangement, materials selection, and building element placement.
April 15, 2004 STRATEGIES: Site and Situation – Planning, Designing and Landscaping for Appropriate Desert Integration Energy and resource efficient site planning and landscaping. May 20, 2004 STRATEGIES: Passive First – Reduction of Power Demands Through Design With Nature Passive solar strategies for an energy efficient building through orientation, spatial arrangement, materials selection, and building element placement.
Landscaping for Appropriate Desert Integration Energy and resource efficient site planning and landscaping. May 20, 2004 STRATEGIES: Passive First – Reduction of Power Demands Through Design With Nature Passive solar strategies for an energy efficient building through orientation, spatial arrangement, materials selection, and building element placement.
Energy and resource efficient site planning and landscaping. May 20, 2004 STRATEGIES: Passive First – Reduction of Power Demands Through Design With Nature Passive solar strategies for an energy efficient building through orientation, spatial arrangement, materials selection, and building element placement.
May 20, 2004 STRATEGIES: Passive First – Reduction of Power Demands Through Design With Nature Passive solar strategies for an energy efficient building through orientation, spatial arrangement, materials selection, and building element placement.
Through Design With Nature Passive solar strategies for an energy efficient building through orientation, spatial arrangement, materials selection, and building element placement.
Passive solar strategies for an energy efficient building through orientation, spatial arrangement, materials selection, and building element placement.
arrangement, materials selection, and building element placement.
Julie 17. 2004 Letinologies, Water = Nicetino Hullian Necus and Connoct
Resource efficiency, applications, and solar heating for domestic use for pools, washing,
and bathing, and for health (distilling).
July 15, 2004 TECHNOLOGIES: Space Heating and Cooling – Passive and
Active Renewable Energy (R.E.) Systems for Gaining Comfort
R.E. heating and cooling thermal mass and skin approaches—from building materials to
cool towers and roof ponds.
August 19, 2004 TECHNOLOGIES: Power From the Sun – Independence and
security with Photovoltaics
Overview of photovoltaic utilization and integration.
September 16, 2004 TECHNOLOGIES: What's Cooking? – Hot Food and Clean
Water Using the Sun
A popular past lecture returned by public demand – using the sun's heat to cook our food
and purify our water. October 24, 2004 MOTIVATIONS: Incentives and Opportunities in Heiner
October 21, 2004 MOTIVATIONS: Incentives and Opportunities in Using
Renewables
Economic and environmental benefits from using renewable energy. November 49, 2004 DENEWARI E FUTURES: Vicions of Appropriate page
November 18, 2004 RENEWABLE FUTURES: Visions of Appropriateness Renewable energy buildings and communities – a view of the future with local designers
sharing their visions.

The lectures are <u>free</u>, but may be changed or altered from time to time. Please check the Calendar on the Solar Center website <u>www.azsolarcenter.com</u> for updates. For more information, please call Dan Aiello, lecture coordinator at (602) 952-8192 or Anthony Floyd, City of Scottsdale at (480) 312-4202.
